

IAN WONG

PLANETARY SCIENCE RESEARCHER

Email: iwong@stsci.edu
Website: www.planetar-ian.net
Phone: (714) 337-9091

Home Address:
7846 Citadel Drive
Severn, MD 21144

EDUCATION

PhD	Caltech Planetary Science Thesis: “Probing the Trojan-Hilda-KBO Connection: An Empirical Test of Dynamical Instability Models of Solar System Evolution” Adviser: Michael E. Brown	2013–2018
B.A.	Princeton University Independent concentration in Linguistics Graduated <i>magna cum laude</i> (GPA: 3.98/4.00)	2008–2012

RESEARCH POSITIONS

Staff Scientist Space Telescope Science Institute	April 2024–present
Research Assistant Professor Department of Physics, American University	August 2023–April 2024
Postdoctoral Researcher NASA Goddard Space Flight Center	August 2023–April 2024
NASA Postdoctoral Program Fellow NASA Goddard Space Flight Center	August 2021–July 2023
51 Pegasi b Postdoctoral Fellow Department of Earth, Atmospheric and Planetary Sciences, MIT	June 2018–July 2021
Graduate Research Assistant Division of Geological and Planetary Sciences, Caltech	June 2013–May 2018

OTHER PROFESSIONAL ACTIVITIES

Member , MAST Users Group	2023–present
Outreach mentor , NASA <i>Lucy</i> mission Here 2 Observe program	2023–2024
Affiliate member , JWST Transiting Exoplanet Community Early Release Science Team	2022–2023
Member , JWST Solar System GTO team	2021–present
Reviewer/panelist on various NSF, NOIRLab, NASA, HST, JWST proposal cycles	2021–present

Affiliate member , NASA <i>Lucy</i> mission science team	2018–present
Referee , AJ, PSJ, A&A, Icarus, MNRAS	2016–present
Research adviser	
• Shiqi Chen: <i>Undergraduate Research Opportunities Program</i> , MIT	2020–2021
• Prajwal Niraula: <i>Graduate Generals Project</i> , MIT	2019–2021
• Aakash Mishra: <i>Research in Science & Engineering</i> , Boston University	Summer 2018
• Angelica Zhou: <i>Summer Undergraduate Research Fellowship</i> , Caltech	Summer 2017
• Yixiao Yan: <i>Summer Undergraduate Research Fellowship</i> , Caltech	Summer 2015
Member of Scientific Organizing Committee , 52 nd Annual DPS Conference	2020
Teaching assistant , Caltech	2014–2018
• Ge 103: Introduction to the Solar System	
• Ge 108: Applications of Physics to the Earth Sciences	
Work intern , Advanced Propulsion Laboratory, NASA Marshall Space Flight Center	Fall 2012
Research intern	
- <i>Undergraduate Student Research Program</i> , Princeton University	Summer 2012
- <i>Program in Plasma Science and Technology</i> , PPPL	Summers 2010 & 2011

FUNDING PROPOSALS

JWST Cycle 4 GO Program #9078 (PI)	2025–2027
\$81,086 [0.166 FTE]	
JWST Cycle 3 GO Program #5940 (PI)	2024–2026
\$48,725 [0.10 FTE]	
JWST Cycle 2 DD Program #4621 (PI)	2024–2026
\$53,194 [0.075 FTE]	
JWST Cycle 2 GO Program #3399 (co-I)	2023–2024
\$57,494 [0.32 FTE]	
HST Cycle 25 GO-15249 (PI)	2018–2021
\$108,107.80

40. “Sub-populations among the Jupiter Trojans”, *Asteroids, Comets, and Meteors, Helsinki, Finland, 2014*.

PUBLIC TALKS

1. “The Kuiper belt in the era of JWST”, *Amateur Astronomers Inc, Union College, 2024*.
2. “A revolution in solar system astronomy with JWST”, *Cosmic Explorations Speaker Series, Lunar and Planetary Institute, 2023*.
3. “Opening a new chapter of exoplanet science with JWST”, *Astronomy Club, Penn State Berks, 2022*.
4. “Opening a new chapter of exoplanet science with JWST”, *Edelman Planetarium, Rowan University, 2021*.
5. “Opening a new chapter of exoplanet science with JWST”, *Brown Planetarium, Ball State University, 2021*.

CONFERENCE POSTERS

1. “Flux recalibration of the MIRI Low Resolution Spectrometer”, *Accurate Flux Calibration in the Era of Space Astronomy and All-Sky Surveys Workshop, Baltimore, Maryland, 2024*.
2. “A detailed exploration of the complex surface chemistry and atmosphere of Triton using JWST”, *The Transneptunian Solar System, Taipei, Taiwan, 2024*.
3. “JWST observations of the Lucy flyby targets: New spectroscopic constraints on Jupiter Trojan composition”, *Asteroids, Comets, and Meteors, Flagstaff, Arizona, 2023*.
4. “TOI 618: A benchmark multi-planet system discovered using TESS photometry and long-term RV monitoring”, *AAS Meeting #241, Seattle, Washington, 2023*.
5. “TESS in the Extended Mission: A powerful tool for time-domain exoplanet science”, *Exoplanets IV, Las Vegas, Nevada, 2022*.
6. “Exoplanet phase curves from TESS: Results from the Primary Mission and future prospects”, *TESS Science Conference 2, online conference, 2021*.

7. “TESS in the Solar System: Refining asteroid light curves with long-baseline photometry”, *EPSC-DPS Joint Meeting, Geneva, Switzerland, 2019*.
8. “Phase curve studies of known transiting systems with TESS”, *Extreme Solar Systems IV, Reykjavik, Iceland, 2019*.
9. “A comparison of Hildas and Jupiter Trojans using photometry, spectroscopy, and size distributions”, *48th DPS Meeting, Pasadena, California, 2016*.
10. “Near-infrared transmission spectra of three cool giant gas exoplanets”, *ExoClimes, Squamish, Canada, 2016*.
11. “The color-magnitude distribution of small Jupiter Trojans”, *46th DPS Meeting, Tucson, Arizona, 2014*.

OBSERVING EXPERIENCE

(PI or co-PI programs, unless otherwise indicated)

James Webb Space Telescope (JWST)

- Cycle 4 DD Program #9453 (11.4 hours, NIRSpec)
“Timely follow-up of newly discovered methane fluorescence on Makemake to investigate its origin and variability”
- Cycle 4 GO Program #9078 (15.6 hours, NIRSpec)
“Probing the origin and interiors of Jupiter Trojans through the study of collisional fragments”
- Cycle 3 GO Program #5940 (7.5 hours, NIRSpec)
“The missing link in the Kuiper belt: Reconnaissance spectroscopy of blue binary cold classical KBOs”
- Cycle 2 DD Program #4621 (4.0 hours, NIRSpec)
“Time-sensitive observations of Chiron: a unique active Centaur beyond 15 AU”

Hubble Space Telescope (HST)

- Cycle 25 GO-15249 (7 orbits, STIS)
“An observational test of the dynamical instability hypothesis in the Solar System”

Gemini South

- 2024B (1.5 hours, GMOS)
“Proving surface inhomogeneities on Patroclus-Menoetius through hemispherically-resolved spectroscopy”

Magellan Observatory

- 2019A+2019B+2020A+2021A (2.5 nights, IMACS, LDSS-3)
“Colors of active Centaurs: A window into KBO formation and composition”
- 2020A+2021A (1 night, IMACS)
“Probing the purported Ennomos collisional family in the Jupiter Trojans”
- 2019B+2020B (3 nights, PFS)
“Exploring the desert: Precise radial velocity confirmation of TESS sub-Saturn candidates”

Cerro Tololo Inter-American Observatory (CTIO)

- 2022A+2022B+2023A (30 hours, CHIRON)
“Radial velocity characterization of the massive outer companions in the TOI-618 and TOI-2488 systems”

- 2021B (10 hours, CHIRON)
“Long-term RV monitoring of the benchmark multiplanet system TOI-618”
- 2019A+2019B+2020A (80 hours, CHIRON)
“Exploring the desert: Precise radial velocity confirmation of TESS sub-Saturn candidates”

NASA Infrared Telescope Facility (IRTF)

- 2020B+2021B (4 nights, SpeX)
“Constraining the composition and origin of Hilda asteroids: Exploring the 3-micron feature”
- 2016A+2016B (7 nights, SpeX)
“Near-infrared spectra of bright Hilda asteroids: Probing the Hilda-Trojan connection”

Palomar 200-inch Hale Telescope

- 2017A+2017B (4 nights, LFC)
“Colors and activity of Centaurs”
- 2018A (2 nights, WASP)
“Photometric observations of mutual events of the Trojan binary Patroclus-Menoetius”

Co-I programs and other observing experience:

- 25.5 hours on JWST Cycle 1 (NIRSpec, MIRI); 42.1 hours on JWST Cycle 2 (NIRSpec); 86.2 hours on JWST Cycle 3 (NIRSpec, NIRCам)
- 30 orbits on HST Cycle 31 (WFC3)
- 4 nights at Palomar 200-inch Hale Telescope (LFC),
- 3 nights at Subaru Telescope (SuprimeCam, Hyper SuprimeCam)
- 5 nights at Keck Observatory (NIRSPEC)

TECHNICAL SKILLS

Programming: Python (expert), IDL (advanced), MATLAB (intermediate), FORTRAN (intermediate)

Developer tools: Git/GitHub, Jira

Libraries: NumPy, SciPy, Astropy, Matplotlib, pandas, scikit-learn, emcee, dynesty

Applications: LaTeX, Overleaf, Microsoft Office, ArcGIS, LabVIEW

Laboratory work: basic machine shop skills, laboratory electronics, lasers

REFERENCES

Stefanie Milam

Research Scientist
Astrochemistry Laboratory (Code 691)
NASA Goddard Space Flight Center
Greenbelt, MD 20771
stefanie.n.milam@nasa.gov

Relationship: Most recent postdoc supervisor, JWST Deputy Project Scientist for Planetary Science, and lead coordinator of JWST Solar System GTO programs

Michael Brown

Professor of Planetary Astronomy
Division of Geological and Planetary Sciences
California Institute of Technology
1200 E California Blvd
Pasadena, CA 91125
mbrown@caltech.edu

Relationship: PhD thesis adviser and collaborator on solar system small bodies research

Heather Knutson

Professor of Planetary Science
Division of Geological and Planetary Sciences
California Institute of Technology
1200 E California Blvd
Pasadena, CA 91125
hknutson@caltech.edu

Relationship: Graduate research adviser and collaborator on exoplanet atmospheric characterization

Avi Shporer

Research Scientist
MIT Kavli Institute
Massachusetts Institute of Technology
77 Massachusetts Ave.
Cambridge, MA 02139
shporer@space.mit.edu

Relationship: TESS Science Team member and collaborator on exoplanet research

Richard Binzel

Professor of Planetary Sciences
Department of Earth, Atmospheric and Planetary Sciences
Massachusetts Institute of Technology
77 Massachusetts Ave.
Cambridge, MA 02139
rpb@mit.edu

Relationship: NASA Lucy Mission Science Team member and former postdoctoral fellowship supervisor
